(57) **CLAIM**

The ornamental design for a portion of a display having a graphical user interface with a transitional icon, as shown and described.

DESCRIPTION

FIG. 1 is a face view of a portion of a display having a graphical user interface with a transitional icon, showing our new design and illustrating to a first image thereof.

FIG. 2 is a face view of a portion of the display having the graphical user interface with the transitional icon, illustrating a second image thereof.

FIG. 3 is a face view of a portion of the display having the graphical user interface with the transitional icon, illustrating a third image thereof.

FIG. 4 is a face view of a portion of the display having the graphical user interface with the transitional icon, illustrating a fourth image thereof.

FIG. 5 is a face view of a portion of the display having the graphical user interface with the transitional icon, illustrating a fifth image thereof.

FIG. 6 is a face view of a portion of the display having the graphical user interface with the transitional icon, illustrating a sixth image thereof.

FIG. 7 is a face view of a portion of the display having the graphical user interface with the transitional icon, illustrating a seventh image thereof.

FIG. 8 is a face view of a portion of the display having the graphical user interface with the transitional icon, illustrating an eighth image thereof.

FIG. 9 is an annotated face view of the first image of the design, as shown in FIG. 1.

FIG. 10 is an annotated face view of the second image of the design, as shown in FIG. 2.

FIG. 11 is an annotated face view of the third image of the design, as shown in FIG. 3.

FIG. 12 is an annotated face view of the fourth image of the design, as shown in FIG. 4.

FIG. 13 is an annotated face view of the fifth image of the design, as shown in FIG. 5.

FIG. 14 is an annotated face view of the sixth image of the design, as shown in FIG. 6.

FIG. 15 is an annotated face view of the seventh image of the design, as shown in FIG. 7.

FIG. 16 is an annotated face view of the eighth image of the design, as shown in FIG. 8.

FIG. 17 is an enlarged face view of a portion of the first image of the design, as illustrated in FIG. 1 and indicated by FIG. 9, according to a first embodiment of the portion indicated by FIG. 9.

FIG. 18 is an enlarged face view of a portion of the first image of the design, as illustrated in FIG. 1 and indicated by FIG. 9, according to a second embodiment of the portion indicated by FIG. 9.

FIG. 19 is an enlarged face view of a portion of the second image of the design, as illustrated in FIG. 2 and indicated in FIG. 10, according to a first embodiment of the portion indicated by FIG. 10.

FIG. 20 is an enlarged face view of a portion of the second image of the design, as illustrated in FIG. 2 and indicated by FIG. 10, according to a second embodiment of the portion indicated by FIG. 10.

FIG. 21 is an enlarged face view of a portion of the third image of the design, as illustrated in FIG. 3 and indicated by FIG. 11, according to a first embodiment of the portion indicated by FIG. 11.

FIG. 22 is an enlarged face view of a portion of the third image of the design, as illustrated in FIG. 3 and indicated by FIG. 11, according to a second embodiment of the portion indicated by FIG. 11.

FIG. 23 is an enlarged face view of a portion of the fourth image of the design, as illustrated in FIG. 4 and indicated by FIG. 12, according to a first embodiment of the portion indicated by FIG. 12.

FIG. 24 is an enlarged face view of a portion of the fourth image of the design, as illustrated in FIG. 4 and indicated by FIG. 12, according to a second embodiment of the portion indicated by FIG. 12.

FIG. 25 is an enlarged face view of a portion of the fifth image of the design, as illustrated in FIG. 5 and indicated by FIG. 13, according to a first embodiment of the portion indicated by FIG. 13.

FIG. 26 is an enlarged face view of a portion of the fifth image of the design, as illustrated in FIG. 5 and indicated by FIG. 13, according to a second embodiment of the portion indicated by FIG. 13.

FIG. 27 is an enlarged face view of a portion of the sixth image of the design, as illustrated in FIG. 6 and indicated by FIG. 14, according to a first embodiment of the portion indicated by FIG. 14.

FIG. 28 is an enlarged face view of a portion of the sixth image of the design, as illustrated in FIG. 6 and indicated by FIG. 14, according to a second embodiment of the portion indicated by FIG. 14.

FIG. 29 is an enlarged face view of a portion of the seventh image of the design, as illustrated in FIG. 7 and indicated by FIG. 15, according to a first embodiment of the portion indicated by FIG. 15.

FIG. 30 is an enlarged face view of a portion of the seventh image of the design, as illustrated in FIG. 7 and indicated by FIG. 15, according to a second embodiment of the portion indicated by FIG. 15.

FIG. 31 is an enlarged face view of a portion of the eighth image of the design, as illustrated in FIG. 8 and indicated by FIG. 16, according to a first embodiment of the portion indicated by FIG. 16; and,

FIG. 32 is an enlarged face view of a portion of the eighth image of the design, as illustrated in FIG. 8 and indicated by FIG. 16, according to a second embodiment of the portion indicated by FIG. 16.

The appearance of the transitional image sequentially transitions among the images shown in FIGS. 1-8, among the images shown in FIGS. 9-16, from FIGS. 17 to 19 to 21 to 23 to 25 to 27 to 29 to 31, and from FIGS. 18 to 20 to 22 to 24 to 26 to 28 to 30 to 32. The process or period in which one image transitions to another image forms no part of the claimed design.

The broken line showing of the display and the remainder of the graphical user interface is for the purpose of illustrating environment, and the broken lines form no part of the claimed design.
